

VETERANS AFFAIRS MENLO PARK CAMPUS MASTERPLAN
 MENLO PARK, CALIFORNIA

The project was to develop a new landscape masterplan for the approximate 100 acres site for the Veterans Affairs in Menlo Park. This campus is undergoing a tremendous transformation with its aggressive removal of seismically deficient buildings. While proposing an external campus loop road, a new internal pedestrian campus atmosphere was created with a series of new gardens connecting old and newly proposed buildings for the campus. The masterplan was developed such that it is both environmentally responsible and serves the future needs of the Veterans Affairs in Menlo Park.

Owner: Veterans Affairs
 Architect(s): AECOM (Ellerbe Becket)
 Scope: Lead Design and Management for Campus Masterplan (AECOM)
 Size / Cost: 100 acres / n/a
 Completion: n/a
